**Appendix** 

# **Accounting Policies**

# (i) General Principles

The Statement of Accounts summarises the authority's transactions for the 2024/25 financial year and its position at the year end of 31 March 2025. The authority is required to prepare an annual Statement of Accounts by the Accounts and Audit (England) Regulations 2015 in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting 2024/25 (the Code) supported by International Financial Reporting Standards (IFRS), International Accounting Standards and statutory guidance issued under section 12 of the Local Government Act 2003.

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

The Statement of Accounts has been prepared on a going concern basis. As required by IAS1, it has been assumed that the Council will continue in operation for the foreseeable future.

# (ii) Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from contracts with service recipients, whether for services or the provision of goods, is recognised when (or as) the goods or services are transferred to the service recipient in accordance with the performance obligations in the contract.
- Supplies are recorded as expenditure when they are consumed where there is a gap between the date supplies are received and their consumption they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

An exception to the above relates to electricity and other similar quarterly payments which are charged at the date of meter reading rather than being apportioned between financial years. This policy is consistently applied each year and therefore does not have a material effect on the year's accounts.

As regards private sector housing benefits, payments can relate to periods partly in advance and partly in arrears. The cut-off date applied to such payments is as near to the year end as possible and ensures consistency with the figures used to calculate government subsidy received on such payments.

Council housing rents become chargeable on the Monday of each week for the week ahead. Rent income is accounted for up to and including the last Monday in the financial year. This can therefore include an element relating to the following year for which no adjustment is made.

## (iii) Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24-hours. Cash equivalents are investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Council's cash management.

# (iv) Prior Year Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change, and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effects of transactions, other events and conditions on the Council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

## (v) Charges to Revenue for Non-Current Assets

Services, support services and trading accounts are debited with the following amounts to record the cost of holding fixed assets during the year:

Depreciation attributable to the assets used by the relevant service.

- Revaluation and impairment losses on assets used by the service where there
  are no accumulated gains in the Revaluation Reserve against which the losses
  can be written off.
- Amortisation of intangible fixed assets attributable to the service.

The Council is not required to raise council tax or council housing rents to fund depreciation, revaluation and impairment losses or amortisations. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement equal to an amount calculated on a prudent basis determined by the authority in accordance with statutory guidance. This is known as the Minimum Revenue Provision (MRP).

Depreciation, revaluation and impairment losses and amortisations are therefore reversed out of the General Fund (and the Housing Revenue Account (HRA)) and replaced by the MRP. This is completed with an adjusting transaction with the Capital Adjustment Account within the Movement in Reserves Statement for the difference between the two. This ensures that depreciation, revaluation and impairment losses and amortisations have no overall effect on council tax or housing rent levels.

The Local Authorities (Capital Finance and Accounting) (England) (Amendment) Regulations 2008, require authorities to approve an MRP policy at the beginning of each financial year on setting aside a sum of money from revenue for the repayment of principal on outstanding debt. From 2012/13 onwards the Council has approved a policy such that, for capital expenditure incurred before 1 April 2008, the MRP is based on 4% of the authority's Capital Financing Requirement for the General Fund.

For General Fund capital expenditure incurred after 1 April 2008, the MRP is based upon the estimated life of those assets where the financing was provided by borrowing. The Council has also decided that no voluntary provision for the repayment of debt relating to the HRA should be made in 2024/25.

For finance leases held by the Council as a lessee the MRP charged is equivalent to the principal element of the lease payment.

## (vi) Employee Benefits

#### Benefits Payable During Employment

Short term employee benefits are those due to be settled within 12 months of the yearend. They include such benefits as salaries, paid annual leave and sick leave and are recognised as an expense for service in the year in which employees render service to the Council.

## **Termination Benefits**

Termination benefits are amounts payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy and are charged on an accruals basis to the appropriate service line in the Comprehensive Income and Expenditure Statement

when the Council is demonstrably committed to the termination of the employment of an officer or making an offer to encourage voluntary redundancy.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund or Housing Revenue Account balance to be charged with the amount payable by the Council to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

## Post-Employment Benefits

Employees of the Council are members of the Local Government Pension Scheme, administered by Nottinghamshire County Council. The scheme is a defined benefit scheme in that it provides defined benefits to members (retirement lump sums and pensions), earned as employees worked for the Council.

#### The Local Government Pension Scheme

The Local Government Pension Scheme is accounted for as a defined benefits scheme:

- The liabilities of the Nottinghamshire County Council Pension Fund attributable
  to the Council are included in the Balance Sheet on an actuarial basis using the
  projected unit method i.e. an assessment of the future payments that will be
  made in relation to retirement benefits earned to date by employees based on
  assumptions about mortality rates, employee turnover rates, etc. and
  projections of projected earnings for current employees.
- Liabilities are discounted to their value at current prices using a discount rate that reflects the time value of money and the characteristics of the liability.
- The assets of the Nottinghamshire County Council Pension Fund attributable to the Council are included in the Balance Sheet at their fair value:
  - Quoted securities current bid price
  - Unquoted securities professional estimate
  - Unitised securities current bid price
  - Property market value

The change in the net pension's liability is analysed into the following components:

- Service cost comprising:
  - Current service cost the increase in liabilities as a result of years of service earned this year (allocated in the Comprehensive Income and Expenditure Statement to the services for which the employees worked).

- Past service cost the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years (debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Resources).
- Net interest on the net defined benefit liability or asset (i.e. the net interest expense for the Council) the change during the period in the net defined liability or asset that arises from the passage of time charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement). This is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability or asset at the beginning of the period after taking into account any changes in the net defined benefit liability or asset during the period as a result of contribution and benefit payments.

# Re-measurements comprising:

- The return on plan assets (excluding amounts included in net interest on the net defined benefit liability or asset) charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
- Actuarial gains and losses (changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions) charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
- Contributions paid to the Nottinghamshire County Council Pension Fund cash paid as employer's contributions to the pension fund in settlement of liabilities (not accounted for as an expense).

In relation to retirement benefits, statutory provisions require the General Fund and Housing Revenue Account balance to be charged with the amount payable by the Council to the pension fund in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are appropriations to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and any amounts payable but unpaid at the year end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund and Housing Revenue Account of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

## **Discretionary Benefits**

The authority also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

## (vii) Events after the Balance Sheet Date

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events.
- Those that are indicative of conditions that arose after the reporting period the Statement of Accounts is not adjusted to reflect such events but, where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

# (viii) Financial Instruments

## **Financial Liabilities**

Financial liabilities are recognised on the Balance Sheet when the authority becomes a party to the contractual provisions of a financial instrument and are initially assessed at fair value and are carried at amortised cost. Annual charges to the Financing and Investment income and expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

All borrowings shown in the Balance Sheet consist of the outstanding principal repayable plus accrued interest. Annual interest is charged to the Comprehensive Income and Expenditure Statement in accordance with the loan agreement.

Gains and losses on the repurchase or early settlement of borrowing are credited and debited to the Financing and Investment income and expenditure line in the Comprehensive Income and Expenditure Statement in the year of repurchase/ settlement. However, where repurchase has taken place as part of a restructuring of the loan portfolio that involves the modification or exchange of existing instruments, the premium or discount is respectively deducted from or added to the amortised cost of the new or modified loan and the write down to the Comprehensive Income and Expenditure Statement is spread over the life of the loan by an adjustment to the effective interest rate.

Where premiums and discounts have been charged to the Comprehensive Income and Expenditure Statement or the Housing Revenue Account, regulations allow the impact on the General Fund and Housing Revenue Account Balance respectively to be spread over future years. The Council has a policy of spreading the gain or loss

over the term that was remaining on the loan against which the premium was payable or discount receivable when it was repaid. The reconciliation of amounts charged to the Comprehensive Income and Expenditure Statement or the Housing Revenue Account to the net charge required against the General Fund or Housing Revenue Account Balance is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

## Financial Assets

Certain reserves are kept for managing the accounting processes for non-current fixed assets and retirement benefits and do not represent usable resources for the Council - these reserves are explained in the relevant policies below.

Financial assets are classified based on a classification and measurement approach that reflects the business model for holding the financial assets and their cash flow characteristics. There are three main classes of financial assets measured at:

- amortised cost
- fair value through profit or loss
- fair value through other comprehensive income

The Council's business model is to hold investments to collect contractual cash flows. Financial assets are therefore classified as amortised cost, except for those whose contractual payments are not solely payment of principal and interest.

## Financial Assets measured at Amortised Cost

Financial assets measured at amortised cost are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument.

All such assets held on the Balance Sheet consist of the outstanding principal receivable plus accrued interest. Annual interest is credited to the Comprehensive Income and Expenditure Statement in accordance with the loan agreement.

The Council has provided a limited number of 'soft loans' to employees at less than market rates for the purchase of motor vehicles. These should be correctly shown in the Balance Sheet at fair value. However, the value of these loans is not considered to be material. Accordingly, the value as shown in the Balance Sheet represents the value of any loans made less any repayments that have been received.

Any gains or losses that arise on the derecognition of an asset are credited or debited to the Financing and Investment income and expenditure line in the Comprehensive Income and Expenditure Statement.

#### Expected Credit Loss Model

The Council recognises expected credit losses on all of its financial assets held at amortised cost either on a 12-month or lifetime basis. The expected credit loss model also applies to lease receivables and contract assets. Only lifetime losses are recognised for trade receivables held by the Council.

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses. Where risk has increased significantly since an instrument was initially recognised, losses are assessed on a lifetime basis. Where risk has not increased significantly, or remains low, losses are assessed on the basis of 12 month expected losses.

## Financial Assets measured at Fair Value through Profit or Loss

Financial assets measured at fair value through profit or loss are recognised on the balance sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. Fair value gains and losses are recognised as they occur in the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement.

The fair value measurements of the financial assets are based on the following techniques:

- Instruments with quoted market prices the market price.
- Other instruments with fixed and determinable payments discounted cash flow analysis.

The inputs to the measurement technique are categorised in accordance with the following:

- Level 1 inputs quoted prices (unadjusted) in active markets for identical assets that the Council can access at the measurement date.
- Level 2 inputs inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly.
- Level 3 inputs unobservable inputs for the asset.

Any gains or losses that arise on the derecognition of the asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

## Financial Assets measured at Fair Value through Other Comprehensive Income

Financial assets measured at fair value through other comprehensive income are recognised on the balance sheet when the authority becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. Annual income received from the financial instrument is credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement when it becomes receivable by the authority.

The fair value measurements of the financial assets are based on the following techniques:

- Instruments with quoted market prices the market price.
- Other instruments with fixed and determinable payments discounted cash flow analysis.

The inputs to the measurement technique are categorised in accordance with the following:

- Level 1 inputs quoted prices (unadjusted) in active markets for identical assets that the Council can access at the measurement date.
- Level 2 inputs inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly.
- Level 3 inputs unobservable inputs for the asset.

The Council can elect to classify certain instruments as Fair Value through Other Comprehensive Income, dependent on the contractual arrangements for the instrument.

For an elected financial asset fair value gains and losses are recognised as they occur in Other Comprehensive Income within the Comprehensive Income and Expenditure Statement but are balanced by an entry in the Financial Instrument Revaluation Reserve. In all other circumstances the gain or loss is recognised in the Financing and Investment Income and Expenditure line on the Comprehensive Income and Expenditure Statement before being transferred to the Financial Instrument Revaluation Reserve via the Movement in Reserve Statement

On derecognition of an elected financial asset the balance on the Financial Instrument Revaluation Reserve is transferred to the General Fund via the Movement in Reserves Statement. In all other circumstances the balance on the Financial Instrument Revaluation Reserve is transferred to the Financing and Investment Income and Expenditure line within the Comprehensive Income and Expenditure Statement.

#### (ix) Government Grants and Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Council when there is reasonable assurance that:

- the Council will comply with the conditions attached to the payments, and
- the grants or contributions will be received.

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired by using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-specific Grant Income (non-ring fenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied Reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied Reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

## (x) Heritage Assets

The Council's Heritage Assets are held for their historical and artistic significance and comprise:

- DH Lawrence Birthplace Museum building.
- DH Lawrence Museum Collection, made up of 129 pieces of art, ornaments and other objects of artistic, historic and cultural value
- A painting by Dr Ala Bashir, a respected sculptor and painter, of DH Lawrence which is linked to his most famous novel, Lady Chatterley's Lover. The painting was donated to the Council in 2008.

The museum building is recognised and measured (including the treatment of depreciation and revaluation gains and losses) in accordance with the Authority's accounting rules on property, plant and equipment.

The museum collection and painting are valued periodically, in line with the Code, by a Council Officer with the appropriate knowledge and skill to determine the value of the items held.

The carrying amounts of heritage assets are reviewed where there is evidence of impairment. For example, this may be where the asset has suffered physical deterioration or breakage or where doubts arise as to its authenticity. Any impairment is recognised and measured in accordance with the Council's general policies on impairment.

#### (xi) Intangible Assets

Expenditure on non-monetary assets that do not have physical substance but are controlled by the authority as a result of past events (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council.

Internally generated assets are capitalised where it is demonstrable that the project is technically feasible and is intended to be completed (with adequate resources being available) and the Council will be able to generate future economic benefits or deliver service potential by being able to sell or use the asset. Expenditure is capitalised where it can be measured reliably as attributable to the asset and is restricted to that incurred during the development phase. Research expenditure cannot be capitalised.

Expenditure on the development of websites is not capitalised if the website is solely or primarily intended to promote or advertise the Council's goods or services.

Intangible assets are measured initially at cost. Amounts are only re-valued where the fair value of the assets held by the Council can be determined by reference to an active market. In practice, no intangible asset held by the Council meets this criterion and they are therefore carried at amortised cost. The depreciable amount of an intangible asset is amortised over its useful life to the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

An asset is tested for impairment whenever there is an indication that the asset might be impaired. Any losses recognised are posted to the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Any gain or loss arising on the disposal or abandonment of an intangible asset is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement.

Where expenditure on intangible assets qualifies as capital expenditure for statutory purposes, amortisation, impairment losses and disposal gains and losses are not permitted to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sales proceeds greater than £10,000) the Capital Receipts Reserve.

#### (xii) Interests in Companies and Other Entities

The authority has material interests in companies and other entities that have the nature of subsidiaries, associates and jointly controlled entities and require it to prepare group accounts. Liberty Leisure Limited is a wholly owned subsidiary of the authority which manages the provision of leisure and culture services and its accounts are consolidated with the authority's in accordance with IAS27.

## (xiii) Inventories and Long Term Contracts

Inventories are included in the Balance Sheet at cost. Whilst the Code of Practice on Local Authority Accounting requires inventories to be shown at the lower of cost and net realisable value, a departure from this is permitted under IFRS due to:

- the value of inventories not being considered to be material.
- the cost of analysing inventories between cost and net realisable value outweighing the value to the user of the accounts.

Long term contracts are accounted for on the basis of charging the Surplus or Deficit on the Provision of Services with the value of works and services received under the contract during the financial year

## (xiv) Jointly Controlled Operations and Jointly Controlled Assets

Jointly controlled operations are activities undertaken by the Council in conjunction with other venturers that involve the use of assets and resources of the venturers rather than the establishment of a separate entity. The Council recognises on its Balance Sheet the assets that it controls and the liabilities that it incurs and debits and credits the Comprehensive Income and Expenditure Statement with the expenditure it incurs and the share of income it earns from the activity.

Jointly controlled assets are items of property, plant and equipment that are jointly controlled by the Council and other venturers, with the assets being used to obtain benefits for the venturers. The joint venture does not involve the establishment of a separate entity. The Council accounts for only its share of the jointly controlled assets, the liabilities and expenses that it incurs on its own behalf or jointly with others in respect of its interest in the joint venture and income that it earns from the venture.

#### (xv) Leases

#### The Council as Lessee

The authority classifies contracts as leases based on their substance. Contracts and parts of contracts, including those described as contracts for services, are analysed to determine whether they convey the right to control the use of an identified asset, through rights both to obtain substantially all the economic benefits or service potential from that asset and to direct its use. The Code expands the scope of IFRS 16 Leases to include arrangements with nil consideration, peppercorn or nominal payments.

#### Initial measurement

Leases are recognised as right-of-use assets with a corresponding liability at the date from which the leased asset is available for use (or the IFRS 16 transition date of 1 April 2024, if later). The leases are typically for fixed periods in excess of one year but may have extension options

The authority initially recognises lease liabilities measured at the present value of lease payments, discounting by applying the PWLB annuity rate wherever the interest rate implicit in the lease cannot be determined. Lease payments included in the measurement of the lease liability include:

- fixed payments, including in-substance fixed payments
- variable lease payments that depend on an index or rate, initially measured using the prevailing index or rate as at the adoption date
- amounts expected to be payable under a residual value guarantee
- the exercise price under a purchase option that the authority is reasonably certain to exercise

- lease payments in an optional renewal period if the authority is reasonably certain to exercise an extension option
- penalties for early termination of a lease, unless the authority is reasonably certain not to terminate early.

The right-of-use asset is measured at the amount of the lease liability, adjusted for any prepayments made, plus any direct costs incurred to dismantle and remove the underlying asset or restore the underlying asset on the site on which it is located, less any lease incentives received. However, for peppercorn, nominal payments or nil consideration leases, the asset is measured at fair value.

#### Subsequent measurement

The right-of-use asset is subsequently measured using the fair value model. The authority considers the cost model to be a reasonable proxy except for:

- assets held under non-commercial leases
- leases where rent reviews do not necessarily reflect market conditions
- leases with terms of more than five years that do not have any provision for rent reviews
- leases where rent reviews will be at periods of more than five years.

For these leases, the asset is carried at a revalued amount. In these financial statements, right-of-use assets held under index-linked leases have been adjusted for changes in the relevant index, while assets held under peppercorn or nil consideration leases have been valued using market prices or rentals for equivalent land and properties. The right-of-use asset is depreciated straight-line over the shorter period of remaining lease term and useful life of the underlying asset as at the date of adoption. The lease liability is subsequently measured at amortised cost, using the effective interest method. The liability is remeasured when:

- there is a change in future lease payments arising from a change in index or
- there is a change in the group's estimate of the amount expected to be payable under a residual value guarantee
- the authority changes its assessment of whether it will exercise a purchase, extension or termination option, or
- there is a revised in-substance fixed lease payment.

When such a remeasurement occurs, a corresponding adjustment is made to the carrying amount of the right-of-use asset, with any further adjustment required from remeasurement being recorded in the income statement.

## Low value and short lease exemption

As permitted by the Code, the authority excludes leases:

• for low-value items that cost less than £10,000 when new, provided they are not highly dependent on or integrated with other items, and

 with a term shorter than 12 months (comprising the non-cancellable period plus any extension options that the authority is reasonably certain to exercise and any termination options that the authority is reasonably certain not to exercise).

#### Lease expenditure

Expenditure in the Comprehensive Income and Expenditure Statement includes interest, straight-line depreciation, any asset impairments and changes in variable lease payments not included in the measurement of the liability during the period in which the triggering event occurred. Lease payments are debited against the liability. Rentals for leases of low-value items or shorter than 12 months are expensed. Depreciation and impairments are not charges against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the capital adjustment account from the General Fund balance in the Movement in Reserves Statement.

#### The Council as Lessor

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

## Finance Leases

Where the authority grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet (whether property, plant and equipment or assets held for sale) is written off to the other operating expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the authority's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (ie netted off against the carrying value of the asset at the time of disposal), matched by a lease (long-term debtor) asset in the Balance Sheet.

Lease rentals receivable are apportioned between:

- a charge for the acquisition of the interest in the property applied to write down the lease debtor (together with any premiums received), and
- finance income (credited to the financing and investment income and expenditure line in the Comprehensive Income and Expenditure Statement).

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund balance to the capital receipts reserve in the Movement in Reserves Statement.

Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund balance to the deferred capital receipts reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the capital receipt for the disposal of the asset is used to write down the lease debtor. At this point, the deferred capital receipts are transferred to the capital receipts reserve.

The written-off value of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the capital adjustment account from the General Fund balance in the Movement in Reserves Statement.

#### Operating Leases

Where the authority grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the other operating expenditure line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight-line basis over the life of the lease or where this is initiated by a service to the individual service, even if this does not match the pattern of payments (eg there is a premium paid at the commencement of the lease). Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset and charged as an expense over the lease term on the same basis as rental income.

## (xvi) Overhead and Support Services

The costs of overheads and support services are charged to those that benefit from the supply or service in accordance with the costing principles of the CIPFA Service Reporting Code of Practice (SerCOP). The total absorption costing principle is used – the full cost of overheads and support services are shared between users in proportion to the benefits received, with the exception of:

- Corporate and Democratic Core costs relating to the authority's status as a multi-functional, democratic organisation
- Non-Distributed Costs the cost of discretionary benefits awarded to employees retiring early

These two cost categories are defined in the Service Reporting Code of Practice but are accounted for under Resources in the Comprehensive Income and Expenditure Statement.

## (xvii) Property, Plant and Equipment

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

## Recognition

Expenditure on the acquisition, creation or enhancement of property, plant and equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

In addition, expenditure needs to be above the Council's de-minimis level of £10,000 before it can be recognised as capital. Any spend below this limit is charged to revenue.

## Measurement

Assets are initially measured at cost, comprising:

- the purchase price.
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The Council does not capitalise borrowing costs incurred whilst assets are under construction.

The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Council). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Council.

Donated assets are measured initially at fair value. The difference between fair value and any consideration paid is credited to the Taxation and Non-Specific Grant Income line of the Comprehensive Income and Expenditure Statement, unless the donation has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Assets are then carried in the Balance Sheet using the following measurement bases:

- Infrastructure, community assets and assets under construction depreciated historical cost
- Dwellings fair value, determined using the basis of existing use value for social housing (EUV-SH)
- All other assets fair value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV)

Where there is no market-based evidence of fair value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of fair value.

Where non-property assets that have short useful lives or low values (or both) are involved, depreciated historical cost basis is used as a proxy for fair value.

Assets included in the Balance Sheet at fair value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their fair value at the year end, but as a minimum every five years. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. (Exceptionally, gains might be credited to the Comprehensive Income and Expenditure Statement where they arise from a reversal of a loss previously charged to a service).

Where decreases in value are identified, they are accounted for by:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

## **Impairment**

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

#### **Depreciation**

Depreciation is provided on all property, plant and equipment assets held by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain community assets) and assets that are not yet available for use (i.e. assets under construction).

Depreciation is calculated on the following bases:

Asset	Depreciation Method	Useful Life in Years
Council Dwellings (Non components)	Straight line	80
Council Dwellings (Components)	Straight line	15-40
Council Offices	Straight line	60
Pavilions and Cemetery Chapels	Straight line	30
Other Buildings	Straight line	40
Vehicles, Plant, Furniture and Equipment	Straight line	5
Infrastructure	Straight line	40
Specialist Vehicles	Straight line but with additional charge in year following acquisition	5
Land	No depreciation charged	
Assets Under Construction	No depreciation charged	
Assets Held for Sale	No depreciation charged	

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately. This applies particularly in respect of council house dwellings. Land and buildings are separate assets and are accounted for separately, even when they are acquired together.

Where an impairment loss is charged to the Comprehensive Income and Expenditure Statement, but there were accumulated revaluation gains in the Revaluation Reserve for that particular asset, an amount up to the value of that loss is transferred from the Revaluation Reserve to the Capital Adjustment Account.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

## Disposals and Non-Current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale (adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale) and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of the disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

If part of an asset is replaced with a similar identifiable component, the carrying amount of the replaced or restored component is derecognised with the carrying amount of the new component being recognised. Any gain or loss arising from this process is credited or debited to the Comprehensive Income and Expenditure Statement as appropriate.

With regards to the de-recognition of infrastructure assets or components of an asset, typically infrastructure assets or components are de-recognised when an asset or component is replaced. In these circumstances the Council will be utilising the Statutory Provision 'The Local Authorities (Capital Finance and Accounting) (England) (Amendment) Regulations 2022 SI 1232/2022'. The Council will derecognise infrastructure assets/component at £nil value (i.e. fully depreciated). The exception to this is where an infrastructure asset/component is disposed of via a means other than replacement expenditure (e.g. the sale of an asset). In this case the accounting methods for disposal as set out above will be followed.

Amounts received for a disposal in excess of £10,000 are categorised as capital receipts. The Council has committed to a government scheme whereby, as from 2012/13, housing capital receipts from right to buy sales can only be used towards new affordable council housing, and within five years of their receipt, otherwise they become payable to the government. The balance of receipts held is required to be credited to the Capital Receipts Reserve and can then only be used for new capital investment on council housing or set aside to reduce the underlying need to borrow (the Capital Financing Requirement). Receipts are appropriated to the Reserve from the General Fund Balance in the Movement in Reserves Statement.

The written off value of disposals is not a charge against council tax or housing rents, as the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

## (xviii) Provisions, Contingent Liabilities and Contingent Assets

## **Provisions**

Provisions are made where an event has taken place that gives the Council a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential and a reliable estimate can be made of the amount of the obligation. For instance, the Council may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation.

Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation and are measured as the best estimate at the Balance Sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties. When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the Council settles the obligation.

#### **Contingent Liabilities**

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

## **Contingent Assets**

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the authority.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

## (xix) Reserves

The Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund or Housing Revenue Account balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund or Housing Revenue Account balance in the Movement in Reserves Statement so that there is no net charge against council tax or housing rents for the expenditure.

## (xx) Revenue Expenditure Funded from Capital under Statute

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund or Housing Revenue Account balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of council tax or council house rents.

#### (xxi) VAT

VAT payable is included as an expense only to the extent that it is not recoverable from HM Revenue and Customs. VAT receivable is excluded from income.

#### (xxii) Collection Fund

Billing authorities are required to maintain a separate fund for the collection and distribution of amounts due in respect of council tax and non-domestic rates. The Council acts as an agent, collecting and distributing council tax and business rates income on behalf of the major precepting authorities and central government as well as itself.

The difference between the income collected in the Comprehensive Income and Expenditure Statement and the amount by regulation to be credited to the General Fund is taken to the Collection Fund Adjustment Account and included as reconciling item in the Movement in Reserves Statement.

The Balance Sheet includes the Authority's share of year end balances in respect of Council Tax and Non Domestic Rates relating to arrears, impairment allowances for doubtful debts and overpayments and prepayments and appeals.

Non Domestic Rates amounts are collected on behalf of the other partners of Central Government, Nottinghamshire County Council and Nottinghamshire Fire Authority.

Council Tax amounts are collected on behalf of the other preceptors of Nottinghamshire County Council, Nottinghamshire Police Authority and Nottinghamshire Fire Authority.

As the Collection Fund is conducted on an agency basis, there is a debtor or creditor position between the Council and the major precepting authorities and central government.
